

Task:

1. Check if two trees are IsoMorphic
2. Print BFS levels in separate lines using Iterative approach.

1. Check if two trees are IsoMorphic
2. BFS -> Breadth First Search

$$\text{No. of level} = \text{Height} + 1$$

BFS Recursive  
is not  
efficient.

Iterative  
BFS

BFS -> 2 3 5 9 7

B-S-T

9

9

(12)

(16)

(17)

Steps for Insertion

1 → find the location to be added

2 → Create new Node

3 → return

Observation → InOrder of BST will be ascending.
